Java

```java
class Solution {
    public int maxIncreasingSubarrays(List<Integer> nums) {

    }
}
```

JavaScript

```javascript
/**
 * @param {number[]} nums
 * @return {number}
 */
var maxIncreasingSubarrays = function(nums) {

};
```

TypeScript

```typescript
function maxIncreasingSubarrays(nums: number[]): number {

};
```

C++

```cpp
class Solution {
public:
```

```
    int maxIncreasingSubarrays(vector<int>& nums) {

    }
};
```

C#

```
public class Solution {
    public int MaxIncreasingSubarrays(IList<int> nums) {

    }
}
```

Kotlin

```
class Solution {
    fun maxIncreasingSubarrays(nums: List<Int>): Int {

    }
}
```

Go

```
func maxIncreasingSubarrays(nums []int) int {

}
```
